3 Using Easy PDF Number Pro

Under Windows Operation System, Easy PDF Number Pro can be started either via the desktop shortcut, or directly from Windows explorer.

When you start the program, if you haven't registered our product, you will be informed to purchase the full version.

Then you will be presented with the primary screen.

Add documents

Click the  icon in toolbar will open the standard file browse and select window, where you can browse the folders and find the PDF file you want to mail. Alternatively you can open the "**File**" menu and select "Add PDF Document" to add PDF file.

If you are using Windows Explorer to locate files, you have the convenience of being able to **‘drag and**

drop files into the document window to add PDF file.

Easy PDF Number Pro even allows you to select all files in a particular directory/folder by either using the **Add a Directory** option from the File menu or click the  **Add Folder** icon! Add a directory also supports sub-folders.

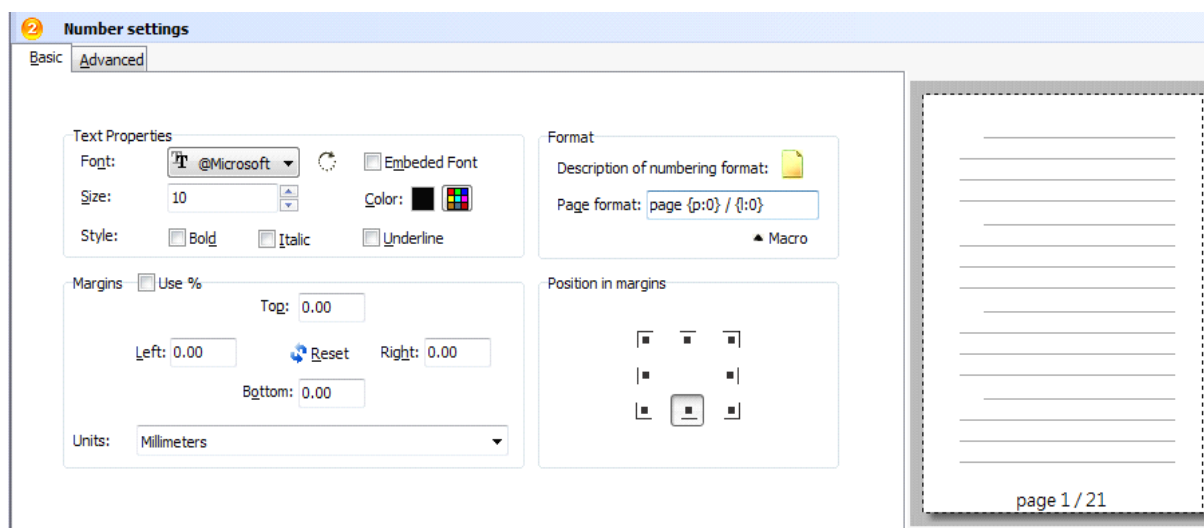

The inserted PDF files will be displayed in file list window. You can change the file order and delete unwanted files.

Number settings

You can customize your page numbers anywhere on the page, specify the style of page numbers, define the font name, size, color etc. Special features include setting prefix and suffix for page number, setting page range for processing, defining start and stop page counts for page groups, reversing page numbering, labeling, and stamping custom text, alignment, custom position, opacity, rotation, symmetry page etc.

Basic

Text properties: You can select the type of the font (in the Font section), color, style (bold, italic, underline) and size of the text. If the font is true type, you have choice to embed the font or not.

Margin: Position and Margin helps you to adjust the position of text watermark. The margin can use either inch/millimeter or percent as unit.

Format: Setting prefix and suffix for page number, the text you enter here is actually the text that will appear as the PDF watermark. You can use macro to specify dynamic text, either select from the Macro list or input directly. As you type you will see in the Preview section how the watermark looks.

Position in margins: Choose the right position in page to stamp page number.

Advance

Number type: Three types of number selectable, including Arabic numerals(1, 2...), ROMAN NUMBER(I , II ...) and lower-roman.

Page range: Select page range to bate number, you can stamp either all pages or Odd/Even pages only.

Text Effect: In Text Effect tab, you can choose a rotation angle if you want the text to be rotated (Rotation, values accepted between 0 and 360) and set an Opacity value so that the text is transparence (values from 0 to 100). 0 means invisible, 100 means visible solid.

You can set a text shadow properties, properties including:

Opacity: To set the text shadow transparence, transparence (values from 0 to 100). 0 means invisible, 100 means visible solid.

Page number: Select specific pages to begin at and end at. Also specific number to begin with and end with.

Output option

Easy PDF Number Page provides two patterns to generate stamped PDF. The first one is to overwrite the original file, and the second one is to save as a new PDF file.

4 Ending Your Session

When you have completed your work , then choose the "**Exit**" option to exit program.
