Add and Edit Watermark

Easy PDF Watermark allows to create 5 types of watermarks, including text, image, PDF, shape and Dynamic Datetime. You

can click button, then select from the pop-up menu.

Create Text Watermark

In Add Text Watermark configuration window. You can configure the text watermark properties here. Once you set the desired options for the text watermark, you can click **OK** to save it, Options that you can set:

Name - you can enter a name for the watermark (note this is not the text that will appear in the PDF, it's used only in the list of available watermarks that you see on the Watermarks list and must be a unique name).

Released2012 page 5 of 14

Text - the text you enter here is actually the text that will appear as the PDF watermark. You can use macro to specify dynamic text, either select from the Macro list or input directly. As you type you will see in the Preview section how the watermark looks.

Text properties - You can select the type of the font (in the Font section), color, style (bold, italic, underline) and size of the text. If the font is true type, you have choice to embed the font or not.

Text Layout - If the **Fit to margins** options is selected the size of the font will be automatically adjusted to fit in the limits of the page margins. If the As **background** option is not checked, the text watermark will be placed on top of the content that currently exists in the document, otherwise it will be placed under the existing content. You can place the text to a fix position or tile in pages by check or uncheck **Tile style** option. **Offx** means x-offset, **Offy** means y-offset. **Position** and **Margin** helps you to adjust the position of text watermark. The margin can use either inch/millimeter or percent as unit.

Text Effect - In Text Effect tab, you can choose a rotation angle if you want the text to be rotated (Rotation, values accepted between 0 and 360) and set an Opacity value so that the text is transparence (values from 0 to 100). 0 means invisible, 100 means visible solid.

You can set a text shadow properties, properties including:

Opacity: To set the text shadow transparence, transparence (values from 0 to 100). 0 means invisible, 100 means visible solid.

Color: text shadow color, to set the color of the shadow, default color is gray.

Angle: To set the angle of the shadow.

Distance: To set the distance of the shadow from the object.

Range - Set pages to be added current watermarks on by selecting a predefined range. It applies to current watermark only.

Preview - in this section you will be able to see how the text watermark will be displayed in the PDF file. Now the text watermark has been defined and saved, it will be shown in the Watermarks list window.

Link - allow you to add link to current watermark, the link action include URL, Go to page and go to remote PDF page type link.

URL type Link: the link can be Web URL (such as "http://www.easy-pdf-tools.com"); can be Email (such as "mailto: tech@easy-pdf-tools.com"); can be FTP;

Go to PDF page type link: the link can navigate you to the special page number in the current PDF.

Go to Remote PDF page type link: the link can navigate you to the special page number from outside PDF file.

Released2012 page 12 of 14

Hot Directories Mode

You may want to monitor a directory in a server, when some one copying the PDF files in, the watermark will be added to PDF and sent to an output directory automatically. In Easy PDF Watermark main window, click the **Hot Directories Mode** button, a Hot Directories Service window will be opened.

Hot Directory Setting:

Monitor Directory- set the directory to monitor. Even Include Sub-Directory.

Output Directory- set output directory where all of converted files will be sent to.

Log File Directory- Log files will be saved in. Log files will record the detail of operation. Such as when to monitor, which file converted, if converting successfully or not.

After setting the directories, click **Start** button to start work, **Stop** button to stop monitoring hot directory.

Released2012 page 13 of 14

Command line

Command line which works as Windows console utility is included to support insert pre-generated watermark to PDF files.

usage:

PWMCMD.exe <input file> [-S<password>] <watermark name|watermark file> [-O<Output File Name>] Return code: 0: Success 2: Input file does not exist 3: Load Input file failed 4: Output file error 5: Some watermark not found 6: No watermark list 7: Create Output file failed 8: Load watermark list fail Example: 1. PWMCMD c:\pdfs\doc.pdf "Text - FINAL" 2. PWMCMD c:\pdfs\doc.pdf "FINAL" "Com Logo" -O"c:\pdfs\out.pdf" 3. PWMCMD "c:\pdfs\doc.pdf" "C:\Watermark\doMark.wm" -o"c:\pdfs\out.pdf" MEMO: "Text - FINAL" is a watermark item defined by A-PDF Watermark GUI(PDFWM.exe), you can display all watermark items by Using Command: PWMCmd.exe -list

4 Ending Your Session

When you have completed your work, then choose the "Exit" option to exit program.
